

### Number day 2024

On Friday the 2<sup>nd</sup> of February we celebrated Number Day. We came into school, dressed in creative number-related non-uniform. We raised money for the NSPCC through taking part.

We started the day with an assembly, where we discussed what makes a good mathematician. We then went back to our classes and took part in some activities. Have a further look to see what each class did.

#### Willow class

We challenged each other to find the different ways to make 5 using a part whole model.

We used magnetic 2D shapes to make outfits for the people drawn.

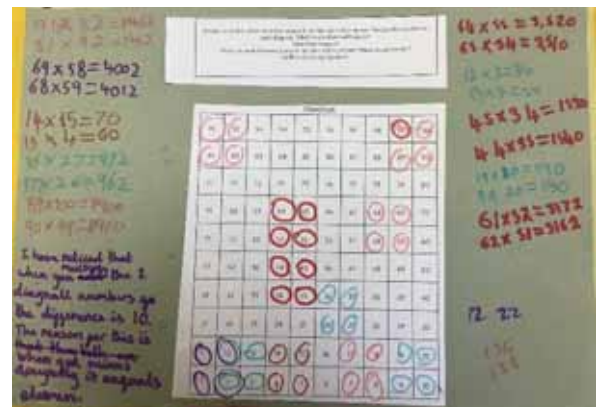

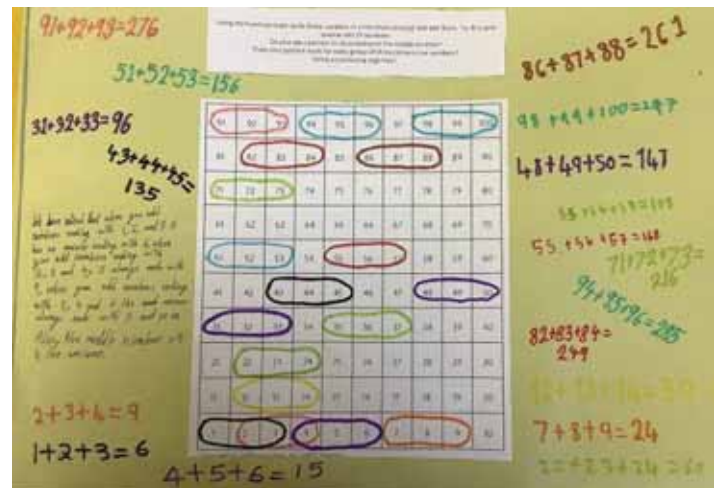

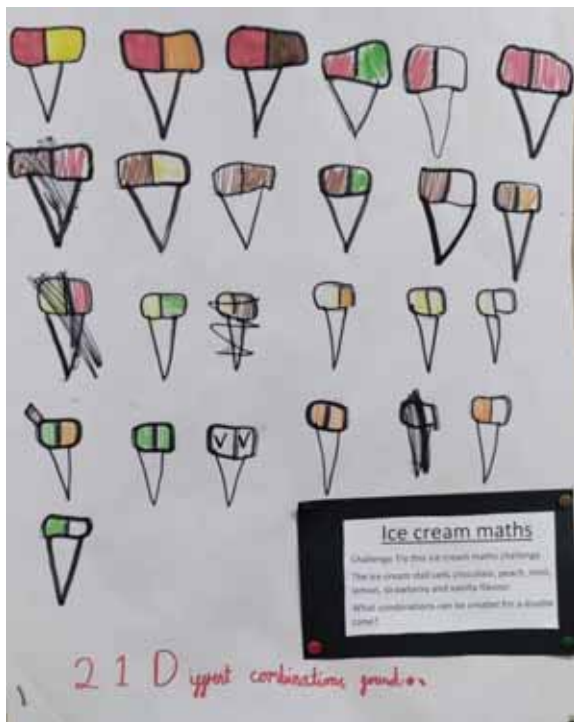

Painted numbers using sponges.

Made a city using Numicon- we realised there was more than 1 way to make the building shapes. 2 pieces of 5 numicon made a 10 shape!

## Elm class

## Cedar class

We completed a heartbeat investigation and we also tried to make the numbers from 1-20 using four 4s.

## Oak class

We completed different 100 square related activities which allowed us to notice patterns we hadn't discovered before.
